

Printer Dover

Spruce version 11.2 -- spooler version 11.2

File: MemX-mwRev-Ch.sil etc.

Creation date: 21-Oct-81 17:53:08

For: Spruce

26 total sheets = 25 pages, 1 copy.

Problems encountered:

Font HELVETICA24B substituted for font HELVE24.

DORADO SCHEMATICS

Mem X

Table of contents

<u>TITLE</u>	<u>Page</u>
Tags, Task, and MD register controls	01
Next, ATask, FinTask, FouTask, PipeTask, CurTask DTask, PipeTask	02

REFRESH CONTROL LOGIC

← FAULTINFO LOGIC

PARITY ERROR LOGIC

HOLD and REPEAT CURRENT Logic

Note: Chip size options are available:
16K only, 16K or 64K, 64K only, 64K
or 256K, 256K only.

Only one of the ChipsAreXXX signals should
be true at any time.

**BREAK THIS BUG LEG
UNTIL 256K CHIPS
ARE USED**

*ChipsAre256k
in the glorious future*

*When the only two chip
options for Dorado are
64K or 256K, then interpret
this signal as ChipsAre256K
and enable the upper gate of ModSel.0*

Hold Debugger

*This counter is for
debugging when "infinite
HOLD" is encountered.
If HOLD is true for more than
64 cycles, LargeHold will
go HIGH and can trigger a
logic analyzer.*

PLATS are BECKMAN 898-3-R027 series resistors 8 per chip

PLATS are Jumper wires for configuration

0000 1111 on rfsh only, else 0

**Dorado Memory Extension Board
Stuffing and Configuration Instructions**

1. If 256 chips are NOT installed in the Memory Storage Arrays (MSA), then
 - a. Break g10.6 (MC104) before stuffing. Label this chip as MemX-g10.
2. Break h20.10 before stuffing. Label this chip as MemX-h20.
 All SG10139 chips are PROMS which must be blown and labeled before stuffing.
 Stuff all PLAT1816 with Beckman type 898-3-R27 resistor packs or equivalent.
3. Do all the actions in one of the following three columns:

Action	16K Map Chips	64K Map Chips	256K Map Chips
Blue Wire	k4.6 to k4.16	k4.5 to k4.16	k4.4 to k4.16
Stuff into MosRam sockets	MK4116-2 or equivalent	TMS4156 or equivalent	256K Ram or equivalent
Jumper wires in socket b14	3 to 14 5 to 12 7 to 10	6 to 11 4 to 13	6 to 11 4 to 13 2 to 15
Jumper wires in socket c12	3 to 14 5 to 12 7 to 10	6 to 11 4 to 13	6 to 11 4 to 13 2 to 15
capacitors in SIP sockets b42,b43,b44,b45,b46,b47 d42,d43,d44,d45,d46,d47	0.1 mmf pins 5 to 8 each socket AND 0.1 mmf pins 1 to 4 each socket	0.1 mmf pins 5 to 8 each socket	0.1 mmf pins 5 to 8 each socket
1 KOhm resistor in socket b14 and 1 KOhm resistor in socket c12	NO	1 to 15 IF Ram has self refresh feature- Motorola or equivalent	NO
22 uf Cap in PLAT c11 & b13	+ 2 to 15 + 4 to 14 + 11 to 6	+ 3 to 14 + 5 to 12	+ 3 to 14 + 5 to 12
